U.S. National Phase Application

Amendments to the Abstract:

ABSTRACT

Please replace the abstract that appears on page 10 of the specification with the following revised abstract which is submitted on a separate sheet.

U.S. National Phase Application

Abstract

~~In a~~ A method for <u>the</u> identification of a user, especially in the case of devices of process automation technology, <u>where</u> at least one person-specific feature of the user is registered with a sensor and compared with stored features. In the case of <u>a</u> match of the registered, person-specific feature with at least one of the stored features, device access is granted.
